# Quarto template

Jozef (ultimate nerd) Rivest

October 16, 2025

This document provides a short introduction to Quarto. A few tips are highlighted all along the file. If you have any questions, feel free to ask me, or to refer to Quarto guide. The best way to learn from it is either to try to replicate some parts, or to change some parts and see how the output changed.

Have fun!

#### First level header

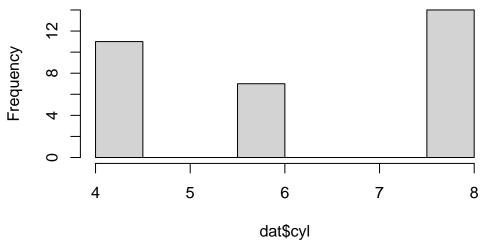

(Svolik 2012)

Svolik (2012)

dat <- mtcars

hist(dat\$cyl)

#### Histogram of dat\$cyl

library(tinytable) # Super nice package for table!
tt(dat)

You can insert math equations the same way you would do in LATEX. Either with the double dollar sign, or using begin{equation} end{equation} in a LATEX chunk.

$$P(A|B) = \frac{P(B|A)P(A)}{P(B|A)P(A) + P(B|A^c)P(A^c)}$$

$$P(A|B) = \frac{P(B|A)P(A)}{P(B|A)P(A) + P(B|A^c)P(A^c)}$$
(1)

### **Appendix**

Sometimes, packages print errors, messages, and warnings. To silence them, you can add the following in the code chunk (see the second code chunk below)

#### library(tidyverse)

```
-- Attaching core tidyverse packages ----- tidyverse 2.0.0 --
v dplyr
           1.1.4
                    v readr
                                 2.1.5
v forcats
           1.0.1
                                 1.5.2
                     v stringr
v ggplot2 4.0.0
                     v tibble
                                3.3.0
v lubridate 1.9.4
                                 1.3.1
                     v tidyr
v purrr
           1.1.0
-- Conflicts ----- tidyverse conflicts() --
x dplyr::filter()
                     masks stats::filter()
x dplyr::lag()
                      masks stats::lag()
x ggplot2::theme_void() masks tinytable::theme_void()
i Use the conflicted package (<a href="http://conflicted.r-lib.org/">http://conflicted.r-lib.org/</a>) to force all conflicts to
library(tidyverse)
```

## Appendix 2

If you want to hide the code, you can add echo: false to the code chunk:

mpg	cyl	disp	hp	drat	wt	qsec	vs	am	gear	carb
$\frac{10}{21.0}$	6	160.0	110	3.90	2.620	16.46	0	1	4	4
21.0	6	160.0	110	3.90	2.875	17.02	0	1	4	4
22.8	4	108.0	93	3.85	2.320	18.61	1	1	4	1
